## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments filed 9/8/08 have been fully considered but they are not persuasive.

First it is argued that the new limitation that the B-staged underfill adhesive is applied as a flowable material is not disclosed by Chung.

Please note that this is a process limitation in a product claim, which is impermissible. The product claim only requires that the B-staged underfill adhesive conformally surround the solder bumps, how it came to be conformal is a process limitation. Even though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process.” In re Thorpe, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985).

Also argued is that the rejection of the claims over Capote's teaching of a B-staged underfill adhesive is a strong case for non-obviousness because if a B-staged underfill adhesive was contemplated by Chung, then Chung would have disclosed the use of one.

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by

Art Unit: 2891

combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, Capote is relied upon to teach the use of a B-staged underfill adhesive is known and it would have been obvious to a skilled artisan to combine this teaching of a B-staged underfill adhesive with Chung.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
